Summary

Frontend Developer with 2 years of experience building responsive and scalable web applications. Experienced in developing user-focused interfaces, improving application performance, and working on real-world projects. Passionate about writing clean and maintainable code, learning new technologies, and contributing to a collaborative team environment to deliver valuable products.

Technical Skills

Frontend:
React.js, Next.js, HTML5, CSS3, Tailwind CSS, Responsive Design

Backend & Database:
Supabase, PostgreSQL, Prisma ORM, REST APIs, Next.js API Routes, Server Actions

Languages
JavaScript (ES6+), TypeScript

Tools:
Git, GitHub, Vercel, Figma

State & Data:
Redux Toolkit, React Query, React Hook Form, Zod, Context API

Concepts:
Authentication, Authorization, SSR, CSR, SEO, Performance Optimization, Component-Based Architecture, CI CD

Experience

Front-End Developer (Internship), *Basaesoft Accounting & Management System* 06/2025 – 12/2025
- Developed ERP features for accounting, sales, treasury, and inventory workflows, improving usability of business processes
- Built reusable dynamic forms and data-driven components with API integration and validation to improve maintainability.
- Created reusable table components for managing complex business data and supporting scalable features.
- Optimized frontend performance and collaborated with backend developers to deliver reliable and user-friendly solutions.

Projects

GymTrix – Smart Gym & Club Management Platform , *Next.js 16, React 19, TypeScript, PostgreSQL, Prisma ORM* 10/2026
- Architected dual-role authentication for managers and members with independent session lifecycles and Edge middleware token verification.
- Integrated biometric fingerprint attendance via REST APIs with daily deduplication logic to prevent duplicate session deductions.
- Engineered a hybrid subscription engine managing both date-bounded and session-based plans with strict server-side state enforcement.
- Built an interactive workout program builder and automated member expiration alerts via scheduled SMS workflows.

Peste Peste , *Next.js, React, TypeScript, Tailwind CSS, Prisma, PostgreSQL* 07/2026 – 01/2026
- Developed a full-stack e-commerce platform for selling pistachio products with authentication, product management, shopping cart, and checkout workflows.
- Built responsive RTL interfaces with reusable components, search, filtering, pagination, and optimized user experience across devices.
- Designed scalable data models and integrated database operations using Prisma ORM and PostgreSQL to manage products, users, and orders efficiently.

Piano Coffee , *Next.js • React • Supabase • PostgreSQL • Tailwind CSS* 06/2026 – 07/2026
- Developed a full-stack e-commerce platform with authentication, admin dashboard, and product management features to provide a complete online shopping experience.
- Built reusable and responsive UI components, implemented CRUD operations, search, filtering, and optimized user workflows for better usability.
- Designed scalable application architecture using Next.js App Router, Server Actions, API Routes, Prisma ORM, and PostgreSQL for efficient data management.

Personal Portfolio , *Next.js • Tailwind CSS*
- Developed SEO-friendly responsive portfolio website.
- Implemented reusable components and dark/light mode.

Education

Bachelor of Science in Computer Engineering, *Azad University* 2022 – Present | Bojnord, Iran
